Objective

I am seeking a qualified role as an AI Developer where I can contribute with technical expertise and take part in projects that drive innovation and efficiency. I aim to work in an environment that encourages collaboration, where knowledge sharing fosters the development of both solutions and processes. My goal is to join an organization that values creativity and technological progress, where I can contribute to the success of both the team and the business.

Education

Python Developer in AI

Nackademin, Stockholm | 2024 – June 2026 | 400 YH credits

Key courses: Python Programming | Business Acumen | Database Technology | DevOps | Python Web Frameworks | Machine Learning | Thesis Project

Portfolio:  <https://www.kendalbal.com/>

This program provides me with strong skills in Python programming, with a focus on AI and machine learning. It equips me to manage fullstack and work with modern AI tools, preparing me for advanced roles in AI development. I have achieved the highest possible grades (VG) in all courses during the first academic year.

Swedish Civil Defence and Resilience Agency – Internship

Stockholm | 2025-10 – 2026-04

I am currently completing my internship at the Swedish Civil Defence and Resilience Agency where I apply my skills to deliver value through AI. I support the team with analytical insights and contribute to the development of scalable solutions

Professional Experience
